

Maxim Biotech, Inc.

Certificate of Analysis

Cat. No.: IH-60038 (VEGF-6001-B)
Biotinylated Long DNA Probe for Human VEGF, all types 8 µg / tube

Form: Liquid 8 µg biotin-labelled DNA in 100 µl ddH₂O

Tm: > 90 °C (Calculated according to the nearest neighborhood method)

Size: 294bp. This biotin-conjugated probe was produced by PCR primers (Maxim's product Catalog # SP-10659) under PCR* conditions using Human cDNA and biotin-dUTPs & biotin-dATPs.

Purity: The biotin-conjugated probe was purified by cartridge and showed a single band on gel.

Storage and Stability: Recommend to store at -20 °C, stable for one year. It is stable for one month when store at 4 °C.

Use: The product is able to detect a fragment of **Human VEGF, all types** in in-situ hybridization when used together with Maxim's in-situ hybridization /detection kit (IHD-0050 & IHD0052) and/or in Northern hybridization.

Sequences: (Alignment on database: Genbank, **AB021221**, **AF214570**)
