Certificate of Analysis

Cat. No.: IH-60062 (HPV-6002)

Biotinylated Long DNA Probe for *H. pylori*/Specific Ag

8 µg / tube

Form: Liquid 8 µg biotin-labelled DNA in 100 µl ddH₂O

Tm: > 90 °C (Calculated according to the nearest neighborhood method)

Size: 298bp. This biotin-conjugated probe was produced by PCR primers (Maxim's product Catalog # SP-10306) under PCR* conditions using Human cDNA and biotin-dUTPs & biotin-dATPs.

Purity: The biotin-conjugated probe was purified by cartridge and showed a single band on gel.

Storage and Stability: Recommend to store at -20 °C, stable for one year. It is stable for one month when store at 4 °C.

Use: The product is able to detect a fragment of ***H. pylori*/Specific Ag** in in-situ hybridization when used together with Maxim's in-situ hybridization /detection kit (IHD-0050 & IHD0052) and/or in Northern hybridization.

Sequences: (Alignment on database: Genbank, **U00679**)
